This fund will be used to create awareness for the Oogi tokens and the BabyApes community so as to attract more users to the project and all it has to offer. Billions of people use social media daily and this allocation can be used to encourage people to the Web 3.0 platform and to make them know about this project. It will be used to pay marketers (in terms of Press Releases which can help produce public brand awareness). By giving some well established influencers incentives, there will be avenues where BabyApes will be featured on strategic Podcast Sessions, Exclusive Interviews and Events etc.

- **25%** or a total of 4.6 billion Oogi tokens will be allocated for staking rewards. Decentralized Exchanges need to have a high supply of Oogi tokens to facilitate effective trades, thus users will be able to stake their Oogi tokens . Those who stake their Oogi tokens will be earning from this allocated Oogi reward pool. The higher the staking amount, the higher the reward the user

receives. This will help in the provision of a low slippage trading experience for users who want to trade and swap on the available decentralized exchanges.
